SUMMARY

Results-driven software professional with a strong academic foundation seeking a challenging role to develop technical skills, apply knowledge, and grow through continuous learning and hands-on experience in a reputable organization.

EXPERIENCE

Internship   Indore, India
Ypsilon IT Solutions Pvt. Ltd.
Duration: 6 Months
- Successfully completed MERN stack training, gaining hands-on experience with MongoDB, Express.js, React.js, and Node.js.
- Developed and tested RESTful APIs for backend services, focusing on clean architecture and reusable code structures.
- Contributed to building full-stack web applications, enhancing frontend responsiveness and backend data handling.

Internship   Indore, India
Desire To Learn (Defence Educational Startup)
Duration - 6 Month
- Managed and optimized app functionality, data, and content.
- Proven ability to connect with students and built trust in order to develop and nurture long term relationship.

EDUCATIONAL QUALIFICATION

B.sc in Computer Science, Mata Jija Bai Govt Girls PG College (DAVV)   Jan '22
                                                                                   Indore, India
- Built solid knowledge in DSA, OS, C/C++, and SQL during COVID-driven virtual learning.

Highschool in 12th, Adarsh Bal Vinay Mandir   Apr '19
                                                                                   Indore, India
- Strong foundation in Math & Computer Science. Sparked my interest in coding and logic.

Highschool diploma in 10th, Adarsh Bal Vinay Mandir   Apr '17
                                                                                   Indore, India
- School topper and chess enthusiast with NCC membership, exceling in academics and extracurricular activities.

PROJECTS

MEALBRIDGE Link
- Building a responsive full-stack platform to connect food donors (restaurants, supermarkets) with NGOs and individuals.
- Implementing features such as real-time food listing, secure Google OAuth login, expiry alerts, and claim tracking.
- Planning an analytics dashboard for tracking food saved, pickup history, and impact metrics.

SHIPPING WAR Link
- Developed a scalable MERN stack application to simplify vehicle allocation and consignment tracking across multiple transport modes.
- Implemented an e-auction system for transporters to bid on consignments, encouraging cost efficiency through competitive pricing.
- Designed a modular backend using Node.js & Express, integrated with MongoDB for dynamic data handling.

SKILLS

Programming Languages   JavaScript, C, Turbo C++
Web Development   Express JS, HTML, CSS, React JS, Node JS
Database Management   MongoDB
Tools   Git (Version Control System), Postman
Soft Skills   Problem Solving, Continuous learner, Effective Communication

DECELARATION

I hereby declare that the information provided is true and correct to the best of my knowledge.
